**Subject:** [EXTERNAL] Byhalia Oil Pipeline

Good Evening Mr Lee,

My name is [Ex. 6 Personal Privacy (PP)] and I live in the 38109 zip code, as does my elderly mother. I recently attended a community meeting and wanted to share why this project should not be approved for this area. This would compromise the drinking water in this area as the clay that protects the Memphis Aquifer can be breached. Oil could potentially be deposited into the soil and will cause harm to every resident in Southwest Memphis. Be on the right side of history with your decision.

Though public comments have closed on this issue, our thoughts and voices have not. We do not need sweet Memphis water compromised by developers from Texas that want to take and abuse our resources. We have to drink this water everyday while they make billions.

Although the permit that you are responsible for approving is only concerned about wetlands and surface level issues, please be aware that these same wetlands and surface level elements can seep into the drinking water. We demand that a detailed study be conducted to protect our water and most importantly our lives.

Thanks

[Ex. 6 Personal Privacy (PP)]

Memphis, 38109
